CROHN'S & COLITIS

Vegas 2011 Honored Teammate – Team Denver

LEXI COUNTERMAN

I'm Lexi and I am your typical 10 year old girl who loves Justin Bieber, music, gymnastics, and am definitely a "girly-girl!"

I was diagnosed with Ulcerative Colitis in December 2010...so, instead of getting excited for the holidays last year, I had to undergo a colonoscopy and start Remicade IV infusions.

I've had to give up my gymnastics for a while because I have to go to Children's Hospital every 4-6 weeks for IV infusions, which will hopefully control my pain and bleeding.

My Mom, Dad, 2 older sisters, & my younger brother (and my great GI doctor at Children's) all help me deal with my disease, but I hope someday for a cure that will allow me to live a normal life with no needles or IVs!

I am excited for my Mom & I to be a part of Team Challenge and to raise money for a CURE!
